

GBATHEME

User Manual

The GBATheme tool allows you to create custom menu themes for the EverDrive-GBA PRO. To make a theme, create a text file containing the configuration directives, and then use gbatHEME.exe to compile it into a theme file.

Supported directives	
fout	Set output file where theme will be saved
tset	Background image source. It should be 16 colors image, 256x256 max resolution.
font	Font source. 128x64
hdr_style	Header bar style. 0: turned off, 1: text only, 3: fill bar, 9: transparent shading, 13: transparent shading with a thin border
hdr_x	Header bar X pos
hdr_y	Header bar Y pos
hdr_w	Header bar width in
hdr_h	Header bar height in
hdr_bx	Header bar text X offset
hdr_by	Header bar text Y offset
hdr_pal	Header bar palette
foot_style	Footer bar style. 0: turned off, 1: text only, 3: fill bar, 9: transparent shading, 13: transparent shading with a thin border
foot_x	Footer bar X pos
foot_y	Footer bar Y pos
foot_w	Footer bar width in
foot_h	Footer bar height in
foot_bx	Footer bar text X offset
foot_by	Footer bar text Y offset
foot_pal	Footer bar palette
fli_style	File manager style. 1: text only, 9: transparent shading, 13: transparent shading with a thin border
fli_x	File manager X pos
fli_y	File manager Y pos
fli_w	File manager width in
fli_h	File manager height in
fli_bx	File manager text X offset
fli_by	File manager text Y offset
fli_pal_bg	File manager background palette
fli_pal_file	File manager text palette: file
fli_pal_dir	File manager text palette: directory
fli_pal_sel	File manager text palette: selected item
fli_pal_border	Thin border palette
menu_pal_box	Menu palette: window
menu_pal_sel	Menu palette: selected text
menu_pal_txt	Menu palette: regular text
menu_pal_inf	Menu palette: info text
menu_pal_msg	Menu palette: message text
menu_pal_hdr	Menu palette: header
menu_pal_foot	Menu palette: footer
palette0-31	Palette 0. Look samples for details
scroll_h	Horizontal scroll speed divided by 16
scroll_v	Vertical scroll speed divided by 16

Theme samples

Samples description

240p	Custom menu layout with many directives exposed
9999	Custom menu layout, modified font, footer and header turned off
basic1	Static image
basic2	Static image
default	Default everdrive theme
sorage	Horizontal scrolling
squares	Vertical and horizontal scrolling
terminal	Custom menu layout, extra palettes, modified font

Notes

There are only 16 physical palettes, but when using the *_pal directive, palette numbers can be specified from 0 to 31. Palettes 0–15 are used for fonts where transparent pixels are filled with color 0 of the selected palette. Palettes 16–31 share the same colors as palettes 0–15, but transparent font pixels are filled with color 1. Palette 15 is used for the background; set colors for this palette only if you want to define the background image colors manually.

Each palette contains 16 colors, with values stored in hexadecimal format, using 5 bits per channel (RGB). The first color is the transparency color (background).

It is recommended to use background images containing no more than 15 colors, so that the system can reserve one color for transparency.

Otherwise, graphical artifacts may appear.

Add the directives to a text file and drag this file onto gbattheme.exe, or use a .bat file as shown in the samples.
